SATELLITE BROADBAND

Our Satellite Broadband brings an internet connection to remote areas and areas without current services.

Safe & SoundTM
Security (UK) Limited

This is an ideal solution for projects where utilities, infrastructure and onsite connectivity is cost restrictive or impractical.

Utilising Satellite Technology we can provide a broadband connection anywhere - provided there is a power supply and suitable location to mount a satellite dish that has an unobstructed view of the sky (as with satellite TV).

Satellite Broadband can be adapted to provide a range of functionality with some of our customers benefiting from integration with other products and services we provide such as multi site communication and CCTV.

PACKAGES:

Satellite Broadband is available on three cost effective monthly packages offering choice and value to fit the needs of your organisation or business.

- 🔒 No need for landline rental costs
- 🔒 No dependency on variable 3G and 4G coverage
- 🔒 No sharing with everyone around you
- 🔒 Options for wireless router*
- 🔒 Options for VOIP phones and call package*

All of our Satellite Broadband packages are available to either rent or buy.
